### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claim 18 and the claims dependent thereon have been allowed because none of the references of record teach or suggest the claimed method for processing flue gas scrubber material flows, comprising:

- scrubbing in a flue gas scrubber flue gas with a washing fluid containing calcium-based adsorbent to absorb sulfur oxides from the flue gas;

- directing a formed gypsum slurry from the flue gas scrubber to a separator, in whose separation point the gypsum is separated from the washing fluid, and from which the gypsum and washing fluid are taken out as separate material flows; and

- directing the washing fluid from the flue gas scrubber to a tank located before the separating point of the separator or after the separation point of the separator, in which tank foam is separated from the washing fluid as its own phase and taken out from the tank.

Claim 26 and the claims dependent thereon have been allowed because none of the references of record teach or suggest the claimed apparatus for processing flue gas scrubber material flows, comprising:

- a flue gas scrubber using a washing fluid comprising a calcium-based absorbent;
- an outlet line for directing the gypsum-containing washing fluid out of the scrubber;

- a separator having a separation point for separating the gypsum and the washing fluid; and

a tank arranged in a direction of flow of the washing fluid before a separation point of the separator or after the separation point of the separator, in which there are means for separating foam from the upper part of the tank and an outlet for removing clean washing fluid from foam.

Any comments considered necessary by the applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
